Profile

AI Engineer ranked 2nd in class at the Faculty of Electronic Engineering, Menoufia University, with hands-on experience in Machine Learning, Deep Learning, NLP, Generative AI, RAG, and GraphRAG systems. Experienced in building AI-powered applications using Python, FastAPI, LangChain, LangGraph, Neo4j, Vector Databases, and LLMs. Developed end-to-end AI solutions including multi-agent systems, intelligent assistants, semantic search platforms, and production-ready RAG applications. Passionate about solving real-world problems through scalable and practical AI solutions.

Education

B.Sc.in computer Science and Engineering

Sep 2020 - Jun 2025

Grade : Excellent (with Honors ranked 2nd)

Graduation Project : Smart Wheelchair – AI-powered assistive mobility system integrating Computer Vision, IoT, Health Monitoring, and Flutter-based mobile control.

Experience

• **AI Internship |Global Brands Group (GBG)**

02/2026 – 05/2026

- Developed AI-powered applications leveraging LLMs, RAG, and GraphRAG architectures for enterprise use cases.
- Built and deployed AI services and REST APIs using FastAPI and modern AI frameworks.
- Worked with vector databases, semantic retrieval pipelines, and knowledge-driven AI systems.
- Collaborated on on-premises AI deployment environments and enterprise AI infrastructure.
- Contributed to the development of scalable Generative AI solutions for business automation and analytics.

• **National Telecommunication Institute (NTI) – Hire Ready Program |Smart Village - Giza**

10/2025 -01/2026

- Completed an intensive 4-month (+288 Hours) AI training program covering Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, and RAG.
- Developed, trained, and evaluated AI models using Python, Scikit-learn, TensorFlow, and PyTorch, applying end-to-end ML workflows.
- Designed and implemented LLM-powered systems, including RAG applications and AI chatbots with LangChain, and built scalable multi-agent workflows using LangGraph for automation and analytics.

Projects

• **WorkLaw Copilot project :**

- Built a production-ready Arabic Legal AI Assistant using **GraphRAG, Neo4j, FastAPI, Streamlit, and Azure OpenAI GPT-4.1** for Egyptian Labor Law analysis and question answering.
- Designed a complete **PDF-to-Knowledge-Graph RAG pipeline** with Arabic NLP preprocessing, embeddings generation, vector search, and semantic retrieval across legal articles and definitions.
- Implemented a hybrid retrieval architecture combining **Explicit Retrieval, Semantic Search, and Graph Expansion** to improve legal reasoning, context awareness, and reduce hallucinations.
- Developed scalable **REST APIs, interactive graph visualizations, source-traceable responses, voice input, and real-time streaming** for an explainable AI legal assistant experience.

• **AI Procurement Agent System :**

- Built an **AI Procurement Agent** using **CrewAI, LLMs, RAG, and Agentic AI** to automate intelligent product sourcing, supplier analysis, and procurement workflows.
- Implemented **multi-agent collaboration, semantic search, AI-driven reporting, and autonomous decision-making pipelines** using modern Generative AI technologies.

• **CV-RAG Hiring Assistant**

- Engineered a production-grade **AI Hiring Assistant** using **RAG, LLMs, and Vector Databases** for intelligent CV screening and candidate evaluation.
- Demonstrated expertise in **Generative AI, Embeddings, Prompt Engineering, NLP Pipelines, and Scalable AI Application Development.**

- **Mini-Rag Project :**
 - Built a Mini RAG system leveraging FastAPI, MongoDB, Qdrant, and Cohere to enable intelligent document retrieval.
 - Designed and implemented document ingestion pipelines for PDF/TXT processing, chunking, and metadata storage.
 - Developed semantic search capabilities using embedding models and vector databases for context-aware information retrieval.
 - Followed clean architecture practices with modular components, dependency inversion, and extensible AI provider integrations.
- **Smart Wheelchair (Graduation Project):** (Graduation Project))

AI-powered wheelchair using **machine learning** and **IoT sensors** for autonomous navigation and real-time **health monitoring**, with **Flutter-based mobile control**.

Certifications:

• Information Technology Institute (ITI) – CREATIVA Menoufia, Egypt	Issued: Aug 2024
• Artificial Intelligence Fundamentals – IBM	Issued: Sep 2025
• Getting Started with Deep Learning – NVIDIA	Issued: Dec 2025
• Introduction to Transformer-Based Natural Language Processing – NVIDIA	Issued: Dec 2025
• Huawei Certified ICT Associate (HCIA) – AI – Huawei	Issued: Mar 2026
• AI Diploma Certificate of Achievement – GBG Academy	Issued: May 2026
• Neo4j GraphAcademy Certificates (GraphRAG, LangChain, Knowledge Graphs, MCP)	Issued: Jun 2026

Skills

Technical skills

- **Programming languages**
Python, C++, Java, SQL
- **Generative AI & LLM Frameworks**
LangChain, LangGraph, CrewAI, OpenAI API, Azure OpenAI, Hugging Face Transformers
- **Machine Learning & Deep Learning**
TensorFlow, PyTorch, Keras, Scikit-learn, NLP
- **Tools**
Git, VS Code, Jupyter Notebooks, Kaggle, Hugging Face, Streamlit, Docker
- **Techniques**
NLP, Deep Learning, LLMs, LangChain, LangGraph, RAG, prompt engineering, finetuning, computer vision, agents, Vector databases

Soft skills

Communication, Emotional Intelligence, Leadership, Teamwork, Problem-solving, Presentation skills, Creativity

Languages

- **Arabic** Native
- **English** B1
- **French** A2

Additional Information

- **AI Judge in Codeavour Egypt:** Assessed senior and adult programmers from diverse international backgrounds in a competitive coding environment. Evaluated software and hardware projects, reviewed code quality and logic in real-time, and provided structured technical feedback.
- **Military Service Status: Exempted**
